Professional Summary

Software Engineer and B.Tech Computer Science (AI & ML) graduate (2026) with strong Data Structures & Algorithms and core CS fundamentals, proficient in Python, JavaScript and Java. Experienced in building scalable REST APIs and data-driven systems with PostgreSQL, MySQL, and Redis, integrating internal and external services, and shipping reliable, well-tested code through Git, code reviews, Docker, and CI/CD (GitHub Actions). Eager to learn big data and distributed-systems technologies such as Spark, Databricks, and Kubernetes, and to collaborate in a fast-paced team.

Technical Skills

- **Languages:** Python, JavaScript (ES6+), TypeScript, Java, C++, SQL
- **Backend & APIs:** REST APIs (HTTP Methods, Status Codes), Django, Django REST Framework (DRF), FastAPI, Flask, Node.js, JWT Authentication
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive UI
- **Databases:** PostgreSQL (pgvector), MySQL, Redis, Schema Design, Query Optimization, Indexing
- **Cloud, CI/CD & DevOps:** AWS (EC2, S3), Docker, Docker Compose, CI/CD (GitHub Actions), Git, GitHub, Nginx
- **Testing & Quality:** Unit Testing, API Testing, End-to-End Testing, Pytest, Unittest, Jest, Debugging, Root-Cause Analysis
- **CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design
- **AI/ML:** RAG, LangChain, OpenAI/Groq API, Sentence Transformers, Vector Search, ALS Collaborative Filtering

Projects

HireFlow – AI-Powered Application Tracking System

[Live Preview](#) | 2026

Python, Django REST Framework, PostgreSQL, Docker, React, TypeScript

- Designed and built a full-stack hiring platform end to end, applying OOP and REST API principles to serve two user roles (candidates and recruiters) with JWT-based, role-based authentication.
- Modeled relational data in PostgreSQL to power applicant pipelines (Applied to Hired) and hiring metrics, and integrated a React/TypeScript frontend with the backend APIs using TanStack Query.
- Validated core workflows with end-to-end tests, containerized services with Docker Compose for consistent environments, and used Git/GitHub workflows for version control and collaborative development.

RoleMatchAI – FEG Innovation Hackathon 2026

[GitHub](#) | 2026

Next.js, React, Node.js, PostgreSQL, Redis

- Collaborated in a team to design and build an AI-powered discovery assistant, architecting the API and data flow between a decision-making engine and the client application.
- Modeled session and recommendation data in PostgreSQL and Redis, and coordinated development through Git-based version control and code reviews within hackathon deadlines.

Education

Technocrats Institute of Technology, Bhopal

B.Tech in Computer Science and Engineering (AI & ML)

Sep 2022 – May 2026

CGPA: 8.09

Certifications & Achievements

- Oracle Certified Foundations Associate (OCA) – Generative AI Professional; Oracle Cloud Infrastructure (OCI) – AI Foundation Associate (Agentic AI Certified Foundation Associate).
- Solved 250+ Data Structures and Algorithms problems.
- secured top 10% in university coding competitions.

Additional Information

Languages: English, Hindi, Urdu

Interests: Full Stack Development, Backend Development.
